

SEO Audit Report

SEO Audit Report — Tokyo Sushi Speakeasy

Generated: June 2, 2026

This report provides a comprehensive analysis of the current SEO state of the Tokyo Sushi Speakeasy website, documents the optimizations applied, and outlines remaining gaps and next steps for continued improvement.

Before / After Summary

#	Gap	Priority	Before	After	Files Changed
1	sitemap.xml	High	Missing	✓ /sitemap.xml — 5 URLs, weekly/monthly priorities	app/sitemap.xml
2	robots.txt	High	Missing	✓ /robots.txt — Allow: / + sitemap reference	app/robots.txt
3	Per-page titles/descriptions	Medium	All pages shared one OG title/desc	✓ Each page has unique <title>, OG title, OG description, and Twitter card	lib/metadata.js
4	Home hero LCP priority	Medium	Missing priority on hero image	✓ Added priority prop to Hero.tsx	components/Hero.tsx
5	BreadcrumbList JSON-LD	Medium	Missing from schema graph	✓ Added BreadcrumbList with position, name, item for each page	components/Breadcrumbs.tsx
6	Custom 404 page	Low	No not-found.tsx	✓ Branded 404 with links to Home / Menu	app/not-found.tsx
7	Theme color mismatch	Low	Manifest uses #000000	✓ Manifest now #000000 (matches site)	public/site.webmanifest
8	Preconnect / dns-prefetch	Low	Not present	✓ preconnect + dns-prefetch for GTM + Facebook	app/layout.tsx
9	Menu category <p> → <h3>	Low	Categories used <p> tags	<div>✓</div> Changed to <h3> for correct heading hierarchy	components/Menu.tsx
10	loading.tsx / error.tsx	Low	Not implemented	✓ Loading spinner + branded error boundary with retry	app/loading.tsx (new) app/error.tsx (new)

Not addressed

Gap	Reason
Image optimization (images.unoptimized: true)	Required for static export — next/image optimization needs a server. Would require cloud image service or dynamic server.
Video format (.MOV hero video)	Asset-level concern, not a code change. Replace file with H.264 MP4 at the asset level.

1. Metadata

Element	Status	Details
Title tag	✓ Done	Per-page titles: / “Tokyo Club Sushi Speakeasy Modern Japanese Speakeasy in South Beach”, /menu “Sushi Menu Tokyo Club Sushi Speakeasy”, /experience “The Experience Tokyo Club Sushi Speakeasy”, /gallery “Gallery Tokyo Club Sushi Speakeasy”, /contact “Contact

Element	Status	Details
		Tokyo Club Sushi Speakeasy"
Meta description	✔ Done	Per-page descriptions, unique to each page
Viewport	✔ Auto	Injected by Next.js
Charset	✔ Auto	utf-8
Favicon	✔ Done	.ico , .svg , 96x96.png , 180x180 apple touch icon (app/layout.tsx:33-40)
PWA manifest	✔ Done	site.webmanifest with icons, theme/background color #0e0e10 , standalone display
Theme color	✔ Fixed	Manifest now matches dark theme #0e0e10

2. Open Graph & Twitter Cards

Element	Status	Details
OG tags	✔ Done	Per-page title, description, url, siteName, type: website, image with width/height/alt
Twitter card	✔ Done	summary_large_image with per-page title, description, image
Per-page OG customization	✔ Done	Each page now has unique OG title/description via createPageMetadata({ title, description })

3. Structured Data (JSON-LD)

Schema	Status	Details
Restaurant	✔ Excellent	Full PostalAddress , openingHoursSpecification , aggregateRating (4.8 / 200 reviews), telephone , priceRange , servesCuisine , sameAs (Instagram)
WebSite	✔ Excellent	Name, URL, description
WebPage	✔ Excellent	Per-page @id using current path
BreadcrumbList	✔ Done	position , name , item for each path segment — e.g. Home > Menu

File: components/seo/StructuredData.tsx:1-138 — Used on all pages.

4. Canonical URLs

Element	Status	Details
Root canonical	✔ Done	alternates: { canonical: "/" } in root layout
Per-page canonical	✔ Done	Each page overrides via alternates: { canonical: path } in createPageMetadata()

5. Sitemap & robots.txt

Element	Status	Details
sitemap.xml	✔ Done	app/sitemap.ts — 5 URLs with priority, change frequency, lastmod
robots.txt	✔ Done	app/robots.ts — User-Agent: *, Allow: / , sitemap reference

Generated output:

```
<url>
<loc>https://www.tokyosushispeakeasy.com/</loc>
<changefreq>weekly</changefreq>
<priority>1</priority>
</url>
<url>
<loc>https://www.tokyosushispeakeasy.com/menu</loc>
<changefreq>weekly</changefreq>
<priority>0.9</priority>
</url>
```

<url>
<loc>https://www.tokyosushispeakeasy.com/contact</loc>
<changefreq>monthly</changefreq>
<priority>0.6</priority>
</url>
```

6. Semantic HTML

Element	Status	Details
Unique <h1> per page	✔ Done	All 5 pages have a distinct <h1>
Heading hierarchy (h1→h2→h3)	✔ Done	All heading levels now correct — MenuPreview category names changed from <p> to <h3>
Alt text on all images	✔ Excellent	Every <Image> has descriptive, keyword-rich alt text
Semantic elements	✔ Good	<nav>, <header>, <footer>, <article>, <section>, <figure>, <blockquote>, <aside> all used appropriately
ARIA attributes	✔ Good	aria-expanded, aria-label, aria-hidden on interactive elements
HTML lang attribute	✔ Done	<html lang="en">

7. Performance (SEO Impact)

Element	Status	Details
Image priority for LCP	✔ Done	Hero image now has priority for optimal LCP
Font preloading	✔ Auto	Managed by next/font/google
Video poster	✔ Done	Hero video has poster attribute
Script loading strategy	✔ Good	Google Tag and Meta Pixel use strategy="afterInteractive"
Preconnect / dns-prefetch	✔ Done	preconnect + dns-prefetch for googletagmanager.com and connect.facebook.net

8. Internal & External Links

Element	Status	Details
External link rel	✔ Done	rel="noreferrer" on all external links (booking, maps, Instagram, PDF)
Internal navigation	✔ Good	All pages interlinked via siteConfig.nav
NAP consistency	✔ Good	Name, Address, Phone consistent across lib/site.ts and JSON-LD

9. i18n / Hreflang

Element	Status	Details
hreflang tags	✖ Gap	Not implemented (acceptable for single-language site)

10. Rendering Strategy

Element	Status	Details
Static export	✔ Done	output: "export" — all pages pre-rendered at build time
trailingSlash	✔ Done	trailingSlash: true
Custom 404 page	✔ Done	Branded app/not-found.tsx with Home / Menu navigation

Element	Status	Details
loading.tsx	✔ Done	Spinner for Suspense boundaries
error.tsx	✔ Done	Client error boundary with "Try Again" reset

11. Summary

✔ Strengths

Category	Verdict
JSON-LD Structured Data	Excellent — full @graph with Restaurant, WebSite, WebPage, BreadcrumbList
Image alt text	Excellent — every image has descriptive, keyword-rich alt text
Semantic HTML	Excellent — proper elements, headings, ARIA
Open Graph / Twitter Cards	Excellent — per-page unique titles and descriptions
Sitemap & robots.txt	Done — both generated at build time
Custom 404 + error/loading	Done — branded UX for all states
Canonical URLs	Good — per-page implementation
Favicon & PWA manifest	Good — multiple formats, theme color now matches
NAP consistency	Good — aligned across code and structured data
External link attributes	Good — rel="noreferrer" on all outbound links
Preconnect	Done — hints for GTM and Facebook

✖ Remaining Gaps

Category	Issue	Priority
Image optimization	images.unoptimized: true — no WebP/AVIF, no responsive srcset	🟡 Medium
Video format	.MOV instead of web-optimized MP4/WebM	🟢 Low
